

## Implementation K1

# ORCID

## Use Case 1: GEOMAR

Sure — here is the same content in clear bullet points:

- ORCID identifiers for persons are already captured at GEOMAR, but not yet in a fully systematic way
- Capture is currently **manual**, primarily within the publication repository **OceanRep**
- The system used is **EPrints** (with ORCID support)
- **Responsibility:**
  - Capturing: Library
  - Maintenance: Individual researchers
  - There are currently **no documented workflows or institutional guidelines** for ORCID usage
  - A key challenge is the **lack of system integration** across central infrastructure
  - In particular, ORCID information is not yet consistently propagated from:
    - **SAP → Active Directory (AD) → OSIS applications → OceanRep**
  - Improving this integration is an important step toward a more **automated and harmonized ORCID implementation**

Where shall we go?

## Use Case 2: Geoforschungszentrum Potsdam (GFZ)

What is the current status?

Where shall we go?

## Use Case 3: Helmholtzzentrum für Umweltforschung (UFZ)

Implementation Group ORCID:

HMC: Andrea, Manu

UFZ: Johann, Ronny

What is the current status in capturing PIDs? Who is responsible for ORCID?

What tools do we need or are involved?

What are the next steps?

## Use Case 4: KIT

What is the current status?

Where shall we go?

## Use Case 5: Hereon

What is the current status?

Where shall we go?

## Use Case 6: AWI

What is the current status?

Where shall we go?

## Use Case 7: FZJ

What is the current status?

Where shall we go?
