

## Implementation K1

# ROR

## Use Case 1: GEOMAR

### Status

ROR identifiers for organizations are already captured at GEOMAR, but not yet in a fully systematic way.

- Capture is currently **manual**
- ROR information is primarily referenced via the GEOMAR research data website
- **Responsibility:**
  - Capturing and maintenance: Library
  - There are currently **no documented workflows or institutional guidelines** for ROR usage
  - A key challenge is the **lack of integration into central systems**
  - In particular, ROR information is not yet consistently integrated into:
    - **Active Directory (AD) → OSIS applications → OceanRep**
  - Improving this integration is an important step toward a more **consistent and harmonized use of organizational identifiers across systems**

### Outlook

We strive to work with the library and the outreach department to develop a workflow to maintain the GEOMAR ROR in the ROR registry and integrate it into the GEOMAR data systems.

## Use Case 2: Geoforschungszentrum Potsdam (GFZ)

What is the current status?

Where shall we go?

## Use Case 3: Helmholtzzentrum für Umweltforschung (UFZ)

Implementation Group ORCID:

HMC: Andrea, Manu

UFZ: Johann, Ronny

What is the current status in capturing PIDs? Who is responsible for ORCID?

What tools do we need or are involved?

What are the next steps?

## Use Case 4: KIT

What is the current status?

Where shall we go?

## Use Case 5: Hereon

What is the current status?

Where shall we go?

## Use Case 6: AWI

What is the current status?

Where shall we go?

## Use Case 7: FZJ

What is the current status?

Where shall we go?
