

Recommendation 3.0

Recommendation to use PIDInst as the standard reference in technical infrastructures to measuring devices or instruments where appropriate

Description

Status:

Motivation for this Recommendation:

[shortened from below]

Recommendation

PIDInst is used to identify instruments in data infrastructures.

For organizations this means:

- Employ measures and incentives to register instruments with PIDInst at acquisition.
- make a person responsible to maintain the PIDInst for each instrument (e.g. Lab technicians).

For technicians:

- register a PIDInst for instruments which weren't registered yet.
- keep the PIDInst related metadata of your instruments current.
- Keep a written record of the PIDInst on every instrument, where possible
- share the PIDInst with the customer with any measurement data you deliver.

For researchers it means:

- Record an PIDInst with any measurement. You should find it on the instrument.

For data infrastructures:

- record a PIDInst with instruments registered in data infrastructures.
- treat PIDInst metadata as the primary source of truth and update your own metadata accordingly.
- inform the responsible person if you think the PIDInst metadata is not accurate.
